

Defense Standardization Program 101

Steve Lowell
Deputy Director
Defense Standardization Program Of
stephen.lowell@dla.mil

Tutorial Goals

- Target audience = people not in the DSP
- Tutorial focuses only on DSP documents and not other DSP areas such as qualification, item reduction, parts management, engineering practice studies, etc.
- If the tutorial is successful, attendees should know
 - Where they can go for DSP information on policies, procedures, guidance
 - Who to contact with questions about DSP documents
 - How to locate and obtain DSP documents
 - What are the main automated tools
 - The overall DSP structure and processes
- More detailed courses about DSP or standards
 - PQM 103, “Defense Specification Management” (2 weeks) www.dau.mil or contact course instructor Jim Weitzner at james.weitzner@dau.mil
 - PQM 104, “Specification Selection & Application” (2 days)
 - Standards Engineering Society, “A Guide to Standards” (1 day) www.ses-standards.org (Can be taught on-site or is offered at the annual conference)

Types of Standardization Documents Used by DoD

- Non-Government Standard (NGS)
 - Also known as a voluntary consensus standard, it is a standardization document developed by a national or international private sector association, organization, or technical society that plans, develops, establishes, or coordinates standards, specifications, handbooks, and related documents. It does not include company standards.

Types of Standardization Documents Used by DoD

➤ Military Specifications

- Defines requirements & tests for military unique items
- Prior to 1996, identified by MIL-(first letter of the first word of title)-sequential number; e.g. MIL-E-1
- After 1996, identified MIL-PRF-(number) for performance spec or MIL-DTL-(number) for detailed spec
- Revision letters appear after the document number; e.g. MIL-PRF-12345B
- Format & content governed by MIL-STD-961

Types of Standardization Documents Used by DoD

➤ Military Standards

- Defines requirements for military unique processes, test methods, practices
- Five types of standards
 - Interface
 - Test method
 - Standard practice
 - Manufacturing process
 - Design criteria
- Identified as MIL-STD-(number)
- Revision letter appears after number; e.g. MIL-STD-961E
- Format & content governed by MIL-STD-962

Types of Standardization Documents Used by DoD

➤ Military Handbooks

Different DSP Document Status

➤ Active

- Document is actively maintain by DoD
- Document is being used by DoD in all types of applications (e.g., new design, sustainment, testing, maintenance, etc)

➤ Inactive for New Design

- Document is generally not being maintained by DoD, although updates are allowed
- Document is being retained to support legacy systems
- While not prohibited in new designs, should be reactivated if use in new designs is common
- Over 8000 inactive for new design documents
